The screenshot displays the AWS IAM dashboard. The top navigation bar includes the AWS logo, a 'Services' menu, a search bar with the text '[Alt+S]', and user information for 'admin_con @'. The left sidebar shows the 'Identity and Access Management (IAM)' section with a search bar and a list of navigation items: Dashboard, Access management (expanded), User groups, Users, Roles, Policies, Identity providers, and Account settings. The main content area is titled 'IAM dashboard' and features a 'Security recommendations' section with a red notification badge '1'. It lists three recommendations: 'Root user has MFA' (checked), 'Add MFA for yourself' (warning), and 'Your user, admin_con, does not have any active access keys that have been unused for more than a year.' (checked). Below this is the 'IAM resources' section with a refresh button and a list of links for User groups, Users, Roles, Policies, and Identity providers. On the right, the 'AWS Account' section displays the Account ID (372223242493), Account Alias (372223242493), and Sign-in URL (https://372223242493.signin.aws.amazon.com/console). A 'Quick Links' section at the bottom right contains a link for 'My security credentials'.
